DETAILED ACTION

Election/Restrictions

Claims 18 and 29 are in the case.

Upon further consideration claims 18 and 19 are examined together as requested by the applicants.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 18 is rejected under 35 U.S.C. 103(a) as obvious over Ramwell et al. US 5002965.

Ramwell et al. teach Ginkgolide A and Ginkgolide J (see Table Column 3) isolated from Ginkgo biloba leaves. Chinese traditional medicine uses these leaves and

fruits of this plant to treat number of diseases. Also see applicant provided reference Drieu et al. History, Development and Constituents of EGb 761, IDS-CG1, filed 11/13/2008). One of skill in the art would anticipate that chewing of the leaves would inherently provide a composition consisting/comprising of Ginkgolide A and Ginkgolide J.

Note:

According to MPEP 2111.03 [R-3] for the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, “consisting essentially of” will be construed as equivalent to “comprising.”

The specification does not set forth what materially effects the properties of the mixture. What specific range provide these properties.

Given the ancient history of pharmaceutical uses of Ginkgo biloba leaves coupled with availability of individual ginkgolides as taught by '965, one of skill in the pharmaceutical art would combine two drugs to arrive at any compositions. Mixing pharmaceutically active compounds for the benefit of additivity and synergism is routine in the practice of pharmaceutical art. Nothing unobvious is seen in the compositions of the instant claim.

The above rejection could be overcome by deleting the claim.

Allowable Subject Matter

Claim 29 is objected to as being dependent upon a rejected base claim 18, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The instant process of making a composition of Ginkgolide A and J, (using reaction kinetics of alkylation of similar functional groups from a mixture of similar compounds) as claimed is unknown in the prior art.
